Dear Governor,

I voted for you. I still believe in you. I am however, confused about why you support fracking gas lines and the Atlantic Coast pipe line. That to me is not environmentally safe and of course put where the most vulnerable people live. All over the country there are serious fracking accidents. It uses large amounts of water and pollutes our drinking water. Halliburton won't release what they know about the chemicals they are injecting into our ground or when there is a spill what are we dealing with. Bad enough NC has Genex dumping into our drinking water. Bad enough every year we have water droughts across the state. I don't understand and I'm hoping you will explain why you supported this pipe line.
